

# Maximum security for your PC systems & mobile devices

®  
**PC-SHERIFF**

Premium

## THE BODYGUARD FOR YOUR IT-SYSTEMS

The PC-SHERIFF® is an instant time machine for your PC and takes over extensive protector functions for your system. It is designed for use in schools, companies and terminals. When installing PC-SHERIFF®, a so-called baseline is set up. This works like a snapshot of a system and serves as a starting point.

## PC-SHERIFF® READ-ONLY AND RESISTANT

- **Comprehensive protective function:**
  - Protects your data and software
  - Protects your operating system against operating errors and manipulation
  - Allows you to test software and programs without risk
- **Easy system recovery, even after a crash** (via the baseline by snapshot)
- **For administrators - Good to know:**
  - Subsystem is on DOS level
  - No restart is required for protection on/off!

# PC-SHERIFF®

After starting and installing the baseline, your workstations **are in a protected state**, as all subsequent **changes are saved incrementally**. Your system is always protected and booting from a „specific“ snapshot is easy.

**By the way: The time required for the system to reset is the same as a regular restarts. The speed and simplicity of the PC-SHERIFF® Premium solution thus ensures significant improvements in your business process management and IT administration.**

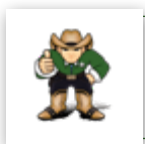

## THE PC-SHERIFF® HAS MANY FUNCTIONS:

### ClientManager, Reboot, Restore, Instant Recovery, Troubleshooting, Rollback, ...

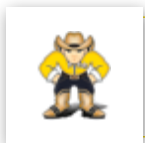

- ✓ **PC System and Data Security**  
Protection of system and data against unauthorized access. Prevention of misuse through encrypted snapshots, e.g. if the system has been stolen or the hard disk is accessed as a secondary drive.
- ✓ **Client Manager**  
The add-on program for a complete server-client-based network management solution. Suitable for PCs with PC-SHERIFF® Premium installed. The administrator can remotely control and manage all PC-SHERIFF® functions.
- ✓ **PC Reboot AND Restore**  
After reboot a reset is performed (adjustable) and thus the baseline configuration is restored, regardless of what the user has changed on the system before (install software, download viruses, change desktop settings). The system remains configured by default and is ready for the next user.
- ✓ **Instant Recovery**  
The scope of performance, flexibility and ease of use enables users and administrators alike to solve PC problems in seconds. Neither hard disk size nor complex problems play a role.
- ✓ **Troubleshooting - PC Snapshot and Rollback**  
PC-SHERIFF® Premium saves tedious and time-consuming analysis and troubleshooting processes without the need for special technical know-how.
- ✓ **PC-SHERIFF® - Fields of application**  
Unlimited protection and a wide range of applications: for schools, universities, educational institutions, authorities, companies, public terminals, libraries, test centres and also for trade fairs, exhibitions, presentations or for private use.

**Do not put off the subject of IT-security too long, because only a well-protected system is really secure! Test our PC-SHERIFF® without obligation! Convince yourself and request NOW our free trial version with full functionality.**

### Further modules for your IT security:

**PC-SHERIFF® easy**  
Maximum security for your  
PC systems and mobile devices

**Mail-Sheriff®**  
Virus & spam protection with  
reputation filter technology

*System requirements: Intel Pentium® or equivalent processor | Microsoft® Windows 7 | 8.1 | 10 (32bit|64bit) | 11 (64bit) | 640MB RAM | 10GB free hard disk space CD / DVD, if installation from CD, otherwise alternatively Internet connection when activated via Internet*
